Digital Paper

Cloud Storage Configuration Guide

Sony Electronics Inc.

9/23/2014

V 1.1

Setting up Digital Paper to connect to Cloud Storage Services

SONY

- Digital Paper can be configured to work with public Cloud Storage Services that support the WebDAV file transfer protocol.

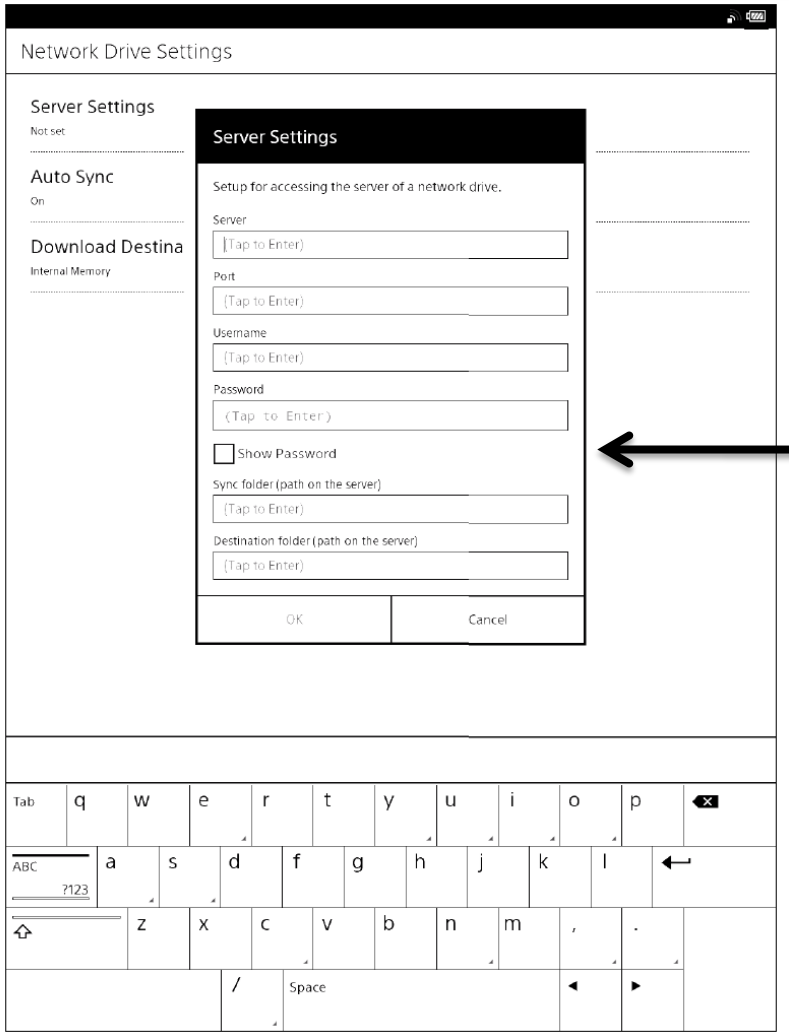
- When properly configured, a Cloud Storage Service account can be synchronized with Digital Paper. PDF formatted documents within the account can be viewed, annotated, and deleted from the Digital Paper. Any changes made to documents on the Digital Paper will be reflected in the Cloud Storage Service account.

- **Please Note: Digital Paper may not support all of the Cloud Storage Service file management functions.**

Setting up Digital Paper to connect to a Box.com account

SONY

Digital Paper Settings Screen



Configure the Digital Paper to communicate with the Box.com account through WebDAV.

From Digital Paper home screen go to **Settings** select **Network Drive Settings** and select **Server Settings.**

Enter the following information into Server Settings of the Digital Paper:

Server: https://dav.box.com/dav
Port: 443
Username: (Box account e-mail address)
Password: (Box account password)
Sync folder: /
Destination folder: (empty)

Setting up Digital Paper to connect to a Box.com account

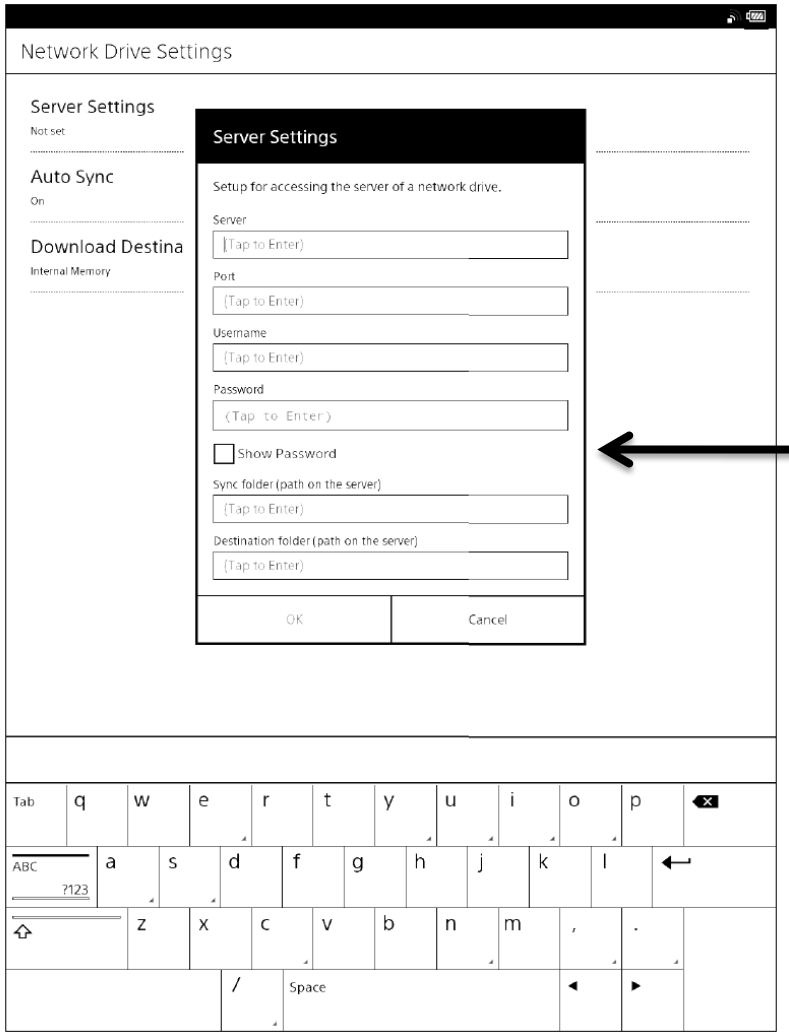
SONY

- Enter following address into the **Server** field: https://dav.box.com/dav
- Enter the following information into the **Port** field: 443
- Enter the user name or email address of the Box account in the **Username** field.
- Enter the password for the Box account in the **Password** field.
- Enter folder path of the Box account that you would like to sync with the Digital Paper into the **Sync Folder** field. If you would like to sync all folders of the Box account, just enter a backslash "/". All documents and sub folders within this path will be automatically synced between the Box account and Digital Paper.
- Leave the **Destination folder** path empty. When sending documents back to the Box account from Digital Paper, all account folders will appear as options.

Setting up Digital Paper to connect to a ShareFile account

SONY

Digital Paper Settings Screen



Configure the Digital Paper to communicate with the ShareFile account through WebDAV.

From Digital Paper home screen go to **Settings** select **Network Drive Settings** and select **Server Settings.**

Enter the following information into Server Settings of the Digital Paper:

Server: https://xxxx.sharefile-webdav.com
Port: 443
Username: (ShareFile account e-mail address)
Password: (ShareFile account password)
Sync folder: /My Files & Folders
Destination folder: (empty)

xxxx- not actual text, see following page

Setting up Digital Paper to connect to a ShareFile account

SONY

- Enter following address into the **Server** field: https://xxxx.sharefile-webdav.com
  Note: xxxx is your ShareFile subdomain. A subdomain is the first part of the login URL. For example, if you log in to https://mycompany.sharefile.com, your subdomain is 'mycompany' (without the quotes)
- Enter the following information into the **Port** field: 443
- Enter the user name or email address of the ShareFile account in the **Username** field.
- Enter the password for the ShareFile account in the **Password** field.
- Enter the root folder path of the ShareFile account: /My Files & Folders
  — All documents and sub folders within "My Files and Folders" will be automatically synced between the ShareFile account and Digital Paper.
- Leave the **Destination folder** path empty. (Sending notes and documents to a ShareFile account is not supported at this time).
